

Job Description

Multi-Disciplined Fire & Security Engineer

Job Title: Fire & Security Engineer (Multi Disciplined)

Salary Expectation: OTE up to £50,000 dependant on experience

Location: Yeovil, Somerset (and local area)

PG Fire & Security has an exciting opportunity for an experienced, motivated and committed individual to join our team as a Multi-Disciplined Engineer (Fire, Security, Data, Audio Visual, Automation).

Based in the Somerset, PG Fire & Security offer full design, consultation, supply, installation and maintenance of all types of electronic fire, security, data, audio visual and automation systems across all market sectors.

The successful candidate will be required to install, commission, service and repair the aforementioned systems and associated equipment in accordance with current codes of practice, manufacturer's requirements, British and European Standards.

Key Responsibilities

- Install/commission our wide range of equipment including; Fire and Intruder Alarms, CCTV, Access Control, Audio Visual, and Automation systems.
- To extend existing systems as part of small / remedial works packages.
- Provide excellent service to customers, building solid working relationships.
- Prepare for jobs by reading site plans, specifications and ensuring all equipment is available.
- Fault finding and problem solving when attending call outs / break downs.
- Provide on-site technical support and solutions to customers during both reactive and routine visits
- Complete all company paperwork in a timely and accurate manner.
- Adhere to health and safety requirements.
- Be involved in a 24-hour emergency cover rota. Currently this equates to 1 week in every 5.
- Advise customers on new products and services to improve efficiency.

Essential Skills Requirements

- Good communication, interpersonal and organisational skills
- Must be able to work independently and as part of a team
- Flexible and self motivated
- Full UK driving licence
- DBS clearance (for working in schools)
